

Replenish **1**

NUTRIENTS

PRODUCT OVERVIEW

Replenish Nutrients - 1 is a premier organic, granulated biofertilizer designed to rejuvenate and replenish soil health for home gardens and turfgrass applications. Offering a sustainable alternative to traditional fertilizers, Replenish Nutrients - 1 enriches the soil with naturally sourced phosphate, potassium, and sulphur, enhancing long-term yield and reversing years of soil depletion.

The Replenish Nutrients - 1 formula promotes a healthy balance of beneficial bacteria that enrich soil and support plant growth. These microbes help break down organic matter, improve nutrient availability, and create natural defenses against harmful pathogens. By fostering a thriving microbial ecosystem, Replenish Nutrients - 1 enhances soil health, reduces the need for chemical inputs, and promotes stronger, more resilient plants.

IDEAL USES

Lawns

Home Gardens

Turfgrass

House Plants

Any Areas Requiring Soil Rejuvenation

KEY BENEFITS

- **Sustainable Fertilizer Replacement**
This product directly substitutes chemical-based fertilizers and is ideal for eco-conscious gardeners and landscapers.
- **Soil Probiotic**
Enhances soil biology and health, promoting robust plant growth and vibrant lawns and gardens.
- **Low-Salt Formula**
This formula minimizes the risk of soil salinity, preserving the natural balance and promoting a healthier growing environment.
- **Slow-Release Nutrients**
Provides a steady supply of essential nutrients, ensuring consistent plant growth and reducing the need for frequent reapplication.

OMRI Listed for Organic Use

Replenish Nutrients - 1 proudly carries the OMRI (Organic Materials Review Institute) listing, certifying its suitability for use in certified organic production in Canada and the United States.

INGREDIENTS

- Rock Phosphate
- Muriate of Potassium (Potash)
- Elemental Sulphur
- Organic Compost
- Contains trace amounts of micronutrients, including boron, calcium, iron, copper, zinc, manganese, molybdenum, and magnesium, to give added nutrition to soil microbes and balance soil pH.

DIRECTIONS FOR USE

Apply directly to the soil as per the recommended dosage on the packaging or as advised by an agronomist or gardening expert.

GUARANTEED MINIMUM ANALYSIS

Total Nitrogen (N)	0%
Total Phosphorus (P2O5)	9%
Available Phosphorus	0.5%
Potassium (K2O)	20%
Sulphur (S)	20%
