SUPER KS

Regenerative Potassium + Sulphur Fertilizer

Guaranteed Analysis 0-0-30-35

Super KS is a low-salt, regenerative fertilizer that rebuilds plant-available K and S while feeding soil biology with **active compost**. Designed for one-pass spring or fall application, it delivers a **0-0-30-35** (N-P_2O_5-K_2O-S) guarantee.

WHY SUPER KS

Benefits

- Low-salt potash + sulphur in a single regenerative blend
- Active compost feeds soil biology and builds organic matter
- Unlocks tied-up nutrients to stretch every fertilizer dollar
- Suitable for conventional and sustainable crop programs
- No leaching — all nutrients in mineral form

Application

- Broadcast or seed-placed, spring or fall
- Recommended rate: 200 lb/acre (adjust to soil test)
- Compatible with MAP, MESZ, urea, and starter blends
- Bulk density (loose): 65 lb/ft³
- Inputs micronized to 150 µm

BEST FIT

Soils: low K, low S, and fields where high pH or cold conditions tie up nutrients.

Crops: cereals (wheat, barley, oats), canola, pulses, corn, soybeans, and forages.

Packaging: bulk delivery or 1,000 kg totes, blended or pellet. Manufactured in Canada.
